CSA Program
A Review of Our 2012 Season

2012 was the 3rd year for our 20-week CSA program. Each week's share included several varieties of seasonal vegetables & fruit; some weeks we were able to add herbs.

Because we lost our own tree-fruit crop (plums, peaches, apples, pears) to a late spring frost, we collaborated with other area orchards - our friends & colleagues - to provide apples & peaches for our CSA. The berries - strawberries, blueberries & raspberries - were all ours, as were the vegetables.

We think the variety was good, and we tried to always include a menu-convenient mix of items, with some cooking & storing hints, especially for the less familiar items.
