

Easy Pickin's 2020 CSA Weekly Share Contents

NOTES:

- * Unless otherwise noted, HALF shares get all the same items as FULLs, but in smaller quantities.
- * Where 2 or 3 items are listed as "&/or," it means that the item packed in the share varied according to what was available for harvest, usually by pick-up day & occasionally by FULL / HALF share, as noted.
- * **Tomatoes:** Shares got mostly round red "salad" tomatoes, & occasionally yellow/gold salad tomatoes or San Marzano plum tomatoes, especially in the later part of tomato season.
- * **Lettuce:** usually assorted varieties each week, depending on what was available for picking -- including red & green leaf lettuce, Romaine, and Boston / Bibb / Buttercrunch-Butterhead-Butterleaf types.
- * **Fruit:** is the most weather-dependent & climate-sensitive component of shares. When berries are in season, our ability to provide them is affected by rain - you can't pick berries in wet weather, and they are very perishable so you can't pick them days ahead. Orchard fruits (apples, pears, peaches, plums) are the most climate-sensitive of our crops; production is also affected by spring weather conditions. This year we were lucky to have peaches, but no plums & few Asian pears (so none of either in shares), and the apple harvest was uneven, so shares got mixed & limited varieties in September & October.:

Week 1: 6/15

- * Sweet white Hakurei turnips or carrots, bunched
- * Swiss chard
- * Tatsoi
- * Lettuce heads
- * Strawberries

Week 2: 6/22
