

Easy Pickin's 2018 CSA Weekly Share Contents

NOTES:

- * Unless otherwise noted, HALF shares get all the same items as FULLS, but in smaller quantities.
- * In weeks when the variety of crops available for picking was smaller (1,2,17,18), there would be fewer different items in the share, & only "normal" (a week's worth) amounts of each, so the shares were a bit smaller. This was compensated for in July & August (weeks 7,9-12), when more variety was available, so the shares had more different items & thus a greater overall quantity of produce.
- * Where 2-3 veggies are listed as "&/or," it means that the item packed in the share varied according to what was available for harvest, & sometimes by pick-up day.
- * For fruit, the FULL / HALF share differential was done by (depending on type(s) of fruit):
 - if 1 type of berries or fruit only: FULL gets 2x the amount (& some weeks the fruit varied by day)
 - if 2 types of fruit or berries: ALL shares get 1 type, sometimes only FULLS get the second type

Week 1 - 6/11

- * bok choy
- * Swiss chard (mostly green)
- * lettuce (mini heads, assorted Salanova varieties)
- * green onions (scallions)
- * bunch sweet white Hakurei turnips with greens
